Introduction and Highlights

This 2005 edition of The Supply of Accounting Graduates and the Demand for Public Accounting Recruits is prepared for anyone interested in the demographics of the accounting profession. This report will be useful for individuals involved in planning for university accounting programs, and human resources for accounting firms.

The data reported here are based on a survey conducted in 2005 of U.S. colleges and universities that offer accounting degrees at the Baccalaureate, Master's or Ph.D. level and a survey of public accounting firms and sole practitioners affiliated with the American Institute of Certified Public Accountants (AICPA). The report is presented in two sections: "Accounting Graduates" presents detailed information regarding the number of accounting degrees awarded by universities during the 2003-04 academic year and "Hiring by CPA Firms" reports the hiring of college graduates by public accounting firms in 2004.

Both sections present data weighted to provide a normative profile of the recipients of accounting degrees and individuals newly hired by CPA firms. The Graduates Section reports by level of accreditation held by the college or university. The Hiring Section reports by size of firm. Both reports present detailed gender and ethnic data. A complete description of the methodology used for gathering and weighting data is presented in Appendix A.

Supply Data from Colleges and Universities

- Forty thousand four hundred students were awarded Bachelor's degrees in Accounting and 13,300 were awarded Master's degrees. Compared to 2002-03, the number of Bachelor's degree recipients increased 9% and the number of Master's degrees awarded increased 5.4%.
- The increase in Bachelor's and Master's degrees awarded was seen across the country, except in the Eastern region where Bachelor's degree recipients held steady and Master's degree recipients decreased.
- In 2003-04, more females than males received Bachelor's degrees (55% to 45%) and Master's degrees (54% to 46%) while more males than females received Ph.D.s (61% to 39%).
- Minorities accounted for 23% of accounting bachelor's, 21% of master's graduates, and 38% of Ph.D.s.
- Approximately one-third of 2003-04 Bachelor's degree recipients took positions with public accounting firms and about one-fifth began their careers in business and industry. A majority of Master's degree recipients (53%) went into public accounting. These proportions are similar to the placement of 2002-03 degree recipients.
- Enrollments in accounting programs continued to climb. For the four-year period 2000 to 2004, enrollments are up 19% (to 171,000 in 2004). The increase in enrollments from 2003 to 2004 was 1.5%.

Demand Data from Public Accounting Firms

- In 2004, there was a 17% increase in the number of new accounting graduate hires by the firms compared to 2003. The number of Bachelor's hired increased 13% (to 15,000) and Master's hires increased 33% (to 4,700).
- Over the years, the Institute has tracked the proportions of new hires working variously in accounting/auditing, management consulting and taxation. In 2004, three-quarters of the graduates (77%) accepted accounting/auditing positions, more than one-fifth took assignments in taxation and 2% began work in management consulting for public accounting firms.
- Females comprise the majority (53%) of new graduates hired by public accounting firms. This represents a 1% decrease from 2003.
- Twenty-three percent of new graduate hires were minorities; a 5% increase from the previous year.
- Across all firms surveyed, the annual turnover rate was 12%, a 2% increase over 2003. Turnover rates and firm size are positively correlated.
- In 2004, the turnover rate was higher for females than males, especially at the medium-sized and smaller firms.
- The largest firms are the most ethnically and racially diverse.

Demand Projections by Public Accounting Firms

- In addition to requesting their actual Year 2004 hiring facts and figures, we asked firms to forecast future hiring trends vs. their actual hiring figures in 2004. Estimates of the percentage change from actual accounting graduate hires in 2004 to future hires (in 2005, 2007 and 2009) are very optimistic across all firm sizes.
- Firms' estimates of growth in hiring of non-accounting graduates are also positive, yet more conservative.

Accounting Graduates

The following tables present a variety of characteristics of colleges and universities which awarded accounting degrees during 2003–04 and the individuals who received those degrees. AACSB—International (AACSB) and the Association of Collegiate Business Schools and Programs (ACBSP) appear in several tables because both those organizations accredit business degree programs. Business accreditation focuses on degree programs offered within a business school which may include one or more degrees in accounting. The AACSB also offers specific accreditation of accounting programs which is the highest level of accreditation available for schools that offer accounting degrees. The majority of accounting degree programs are accredited by regional accrediting organizations that review the entire college or university without special emphasis on business or accounting.

College and University Response Rates

Of the 831 colleges and universities asked to participate in the survey, 283 returned completed questionnaires for a response rate of 34%. Last year, the response rate was 29%.

TABLE 1

Number of Schools Surveyed for 2005 Report

	Number of Questionnaires Mailed	Number of Schools Responding	Response Rate %
Accredited in Accounting			
By AACSB	163	83	50%
Accredited in Business			
By AACSB	239	79	33
By ACBSP	99	28	28

FIGURE 1
Trend In Accounting Degrees Awarded
1971–72 Through 2003–04

The reported data indicate a slight increase in the number of Accounting Ph.D.s awarded in 2002-2003.

TABLE 3B
Accounting Ph.D's Awarded
1999–2000 Through 2003–04

	Number of Graduates	Rate of Growth
1999–00	195	+ 5%
2000–01	115	- 41%
2001–02	110	- 4%
2002–03	145	+ 32%
2003-04	150	+ 3%

The number of bachelor's degrees awarded at accounting accredited programs increased in 2003–04 as did the number of MBAs in Accounting and Master's in Accounting.

TABLE 4Accounting Degrees Awarded by AACSB – Accredited Accounting Programs

	Number of AACSB-Accredited Accounting Programs	Bachelor's	MBA in Accounting	Master's in Accounting
1999–00	140	15,750	355	4,585
2000–01	147	15,815	505	4,585
2001–02	156	16,895	650	6,475
2002–03	162	19,925	475	7,645
2003–04	163	22,805	750	9,460

When focusing on AACSB and ACBSP business-accredited programs, the number of bachelors and masters degrees increased as well.

TABLE 5

New Accounting Graduates From AACSB- and ACBSP-Accredited
Business Administration Programs
(including AACSB – Accredited Accounting Programs)

	Number of AACSB- and ACBSP-Accredited Business Administration Programs	Bachelor's	Master's	Total	
1999–00	461	28,070	7,260	35,330	
2000–01	479	28,175	7,235	35,410	
2001–02	494	27,880	9,170	37,050	
2002–03	504	30,590	11,905	42,495	
2003–04	501	33,120	12,635	45,755	

While other business administration programs saw an increase in bachelor's degrees, the number of master's degrees decreased slightly.

TABLE 6

New Accounting Graduates
From Other Business Administration Programs

	Number of Other Business Administration Programs	Bachelor's	Master's	Total	
1999–00	395	9,045	720	9,765	
2000–01	378	9,680	1,465	11,145	
2001–02	355	7,115	530	7,645	
2002–03	337	6,420	750	7,170	
2003–04	330	7,300	705	8,005	

In 2003–04, both public and private schools saw an increase in Bachelor's graduates from the previous year.

TABLE 7

New Accounting Graduates With Bachelor's Degrees
From Public and Private Schools

	Public	Private	
1999–00	26,455	10,660	
2000–01	26,045	11,810	
2001-02	25,195	9,800	
2002–03	26,785	10,225	
2003–04	28,915	11,505	

More public school students received Master's degrees in Accounting; the number of Master's degrees awarded to private school students remained steady.

TABLE 8

New Accounting Graduates With Master's Degrees
From Public and Private Schools

	Public	Private
1999–00	5,125	2,855
2000–01	5,480	3,220
2001–02	6,625	3,075
2002–03	8,835	3,820
2003–04	9,775	3,565

With respect to geographical trends, all regions, except the Eastern region, saw increases in Bachelor's graduates. In the Eastern region the number of Bachelor's graduates continued to decrease.

TABLE 9

New Accounting Graduates With Bachelor's Degrees by Geographic Region

		North			
	Eastern	Central	Southern	Pacific	
1999–00	8,800	9,485	13,220	5,610	
2000–01	9,865	10,505	11,135	6,350	
2001–02	8,800	8,950	12,105	5,140	
2002–03	8,745	9,170	13,225	5,870	
2003–04	8,695	11,295	14,460	5,970	

TABLE 10

New Accounting Graduates With Master's Degrees by Geographic Region

	Eastern	North Central	Southern	Pacific	
1999–00	1,820	1,160	3,100	1,900	
2000–01	1,870	2,180	3,455	1,195	
2001–02	2,275	2,325	3,705	1,395	
2002–03	2,475	3,285	5,335	1,560	
2003–04	1,825	3,850	6,020	1,645	

The number of graduates with Master's in Accounting degrees continued to increase and Master's in Taxation slightly increased, while MBAs in Accounting dropped.

TABLE 11

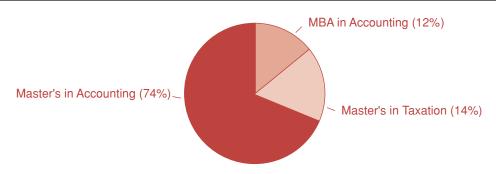

New Accounting Graduates With Master's Degrees by Type

	Master's in Accounting	MBA in Accounting	Master's in Taxation
1999–00	5,390	1,115	1,475
2000–01	5,685	1,630	1,385
2001–02	6,395	1,725	1,580
2002–03	9,120	2,160	1,375
2003–04	9,935	1,610	1,795

The large majority of all Master's degrees awarded were Master's in Accounting.

FIGURE 2

New Accounting Graduates With Master's Degrees by Type 2003–04

Gender Data For New Graduates

55% of all Bachelor's and Master's degrees in accounting were awarded to females in 2003-04.

TABLE 12A

Percentage of New Accounting Graduates by Gender
Combined Bachelor's and Master's Degrees

	26.1 (0/)	T 1 (0()
	Male (%)	Female (%)
1999–00	44	56
2000–01	45	55
2001–02	43	57
2002–03	44	56
2003–04	45	55

In 2003-04, considerably more females than males received accounting Bachelor's degrees. The percentage of females receiving accounting Master's degrees increased by 2% from the previous year. However, the percentage of females receiving accounting Ph.D.s decreased 39% from 44% the previous year.

Accounting Enrollment Trends

Many survey respondents believe that Master's in Accounting will continue to attract greater interest in the future.

TABLE 25
Trends in Enrollment in Accounting Programs*

Percent of Schools Indicating That Enrollment Two Years From Now Will Be: Higher Than The Same Lower Than Current as Current Current Enrollment (%) Enrollment (%) Enrollment (%) 58 38 4 Bachelor's in accounting 72 26 2 Master's in accounting MBA in accounting 51 43 6 Master's in taxation 49 38 13 78 Ph.D. in accounting/taxation 22

^{*} Percentage distributions for each program exclude schools that do not offer that degree.

Uniform CPA Examination

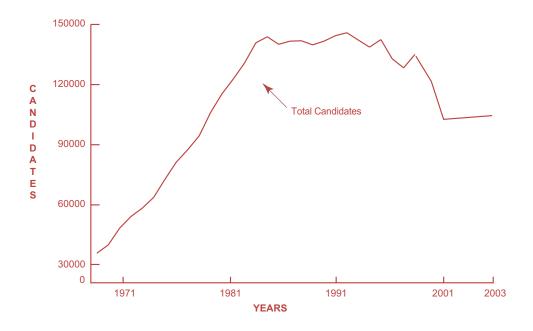

Since the peak years of the early nineties, the number of candidates sitting for the CPA Exam has been in decline. However, in 2002, the number of candidates increased over the previous year and continued to increase in 2003.

Uniform CPA Examination 1971 through 2003

Hiring by CPA Firms

In early 2005, the AICPA conducted a survey of all the public accounting firms affiliated with the Institute. Survey questionnaires were sent to those individuals responsible for human resources and asked a variety of questions about newly employed graduates and professional staff. The core question in the survey asked firms to provide a breakdown of both accounting and non-accounting graduates employed in 2004.

Firms were asked to provide a breakdown of newly employed graduates by gender, ethnic/racial background, and area of assignment (i.e., accounting/auditing, taxation, management consulting services, and other specialty areas). In addition, firms were asked to give information on recruiting activities, professional and paraprofessional staff, and experienced recruits, as well as some general background information.

Because the 17 largest firms account for such a large proportion of newly employed graduates, a greater effort was made to obtain their responses. The firms' responses were tracked, and a series of follow-up phone calls was undertaken in an effort to maximize the collective response rate. A more complete description of the survey is presented in Appendix B.

Public Accounting Firms Response Rates

In total, 5,821 public accounting firms were surveyed and 1,423 responded for a 24% response rate.

TABLE 27
CPA Firms Surveyed for 2005 Report

Number of AICPA Members Per CPA Firm	Total Number of Firms	Number of Firms Surveyed	Number of Firms Responding	Response Rate %
More than 200 members	17	17	14	82
50-200 members	88	88	27	31
10-49 members	1,532	1,532	488	32
Fewer than 10 members	42,092*	4,184	894	21
All CPA firms	43,729	5,821	1,423	24

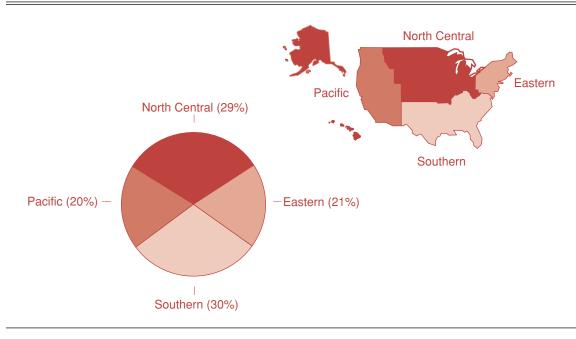

^{*} Total includes 21,600 sole practitioners.

Firms that responded represent all regions of the country. About nine in ten were "local" firms, and 3% were minority-owned.

FIGURE 14

Percentage of New Graduates Hired by CPA Firms by Ethnic/Racial Background — 2004

Hiring Demand Forecast

Firms were asked to forecast future hiring trends relative to actual hiring figures in 2004. Estimates of the percentage change from actual accounting graduate hires in 2004 to future hires (in 2005, 2007 and 2009) are very optimistic across all firm sizes. Firms' estimates of growth in hiring of non-accounting graduates are also positive, yet more conservative.

TABLE 36A

Professional Staff Employed

Professional staff are defined as CPAs, prospective CPAs, and others with a similar amount of academic training in a field that is part of the practice of public accounting.

Looking at the 2004 gender breakdown among all professional staff members (both CPAs and prospective CPAs), 56% were males and 44% were females. There is no clear trend relating firm size to gender ratio.

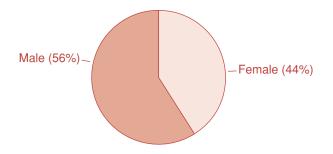

TABLE 37

Percentage of Professional Staff Employed by CPA Firms by Gender — 2004

	Nı					
	More Than 200 Members (%)	50–200 Members (%)	10–49 Members (%)	Fewer Than 10 Members (%)	All CPA Firms (%)	
Male	58	52	54	57	56	
Female	42	48	46	43	44	

FIGURE 15

Percentage of Professional Staff Employed by CPA Firms by Gender — 2004

Again looking at total professional staff, but this time focusing on the ethnic/racial distribution, 90% of all staff members were White, 5% were Asian/Pacific Islander, 3% were Hispanic or Latino and 2% were Black or African American. Firms employing 200 or more members exhibited the most racial/ethnic diversity.

TABLE 38

All CPA firms		
2000	16	
2001	12	
2002	10	
2003	10	
2004	12	

While the ratio of male to female professional staff in 2004 was 56:44, the ratio of males to females who were terminated or resigned was 48:52, reflecting a higher turnover rate for females. Turnover of females occurred more so in the smaller firms.

TABLE 40

Percentage of Professional Staff Terminated by or Resigned
From CPA Firms by Gender — 2004

	Number of AICPA Members Per CPA Firm				
	More Than 200 Members (%)	50–200 Members (%)	10–49 Members (%)	Fewer Than 10 Members (%)	All CPA Firms (%)
Male	54	46	46	44	48
Female	46	54	54	56	52

85% of professional staff members who were terminated or resigned in 2004 were White. Since the percentage of Whites on staff in 2004 was 89%, a disproportionately higher rate of turnover occurred among non-Whites.

Hispanic or Latino	41	*	2
American Indian/Alaska Native	*	*	*
White	6	99	95
Other	*	*	*

^{*} Less than 0.5%.

Experienced Recruits Hired*

The survey also asked firms if in 2004 they hired more or fewer experienced recruits (as opposed to new graduates) than they did in 2003. Table 46 shows results for different size firms. 86% of the firms surveyed said they hired about the same number of experienced recruits in 2004 as in 2003. Firms with more than 200 AICPA members reported a significantly higher percentage of experienced recruits.

*Experienced recruits are defined as professional staff hired at above entry-level.

TABLE 46 Experienced Recruits Hired in 2004 Relative to 2003 by CPA Firm Size

Number of AICPA Members Per	Percent of CPA Firms Indicating That the Number of Experienced Recruits Hired in 2003 Relative to 2002 Was:					
CPA Firm	Higher (%)	Lower (%)				
More than 200 members	92	8	0			
50-200 members	59	22	19			
10-49 members	35	49	16			
Fewer than 10 members	6	88	6			
All CPA firms	8	86	6			

Paraprofessional Staff Hired*

Turning to whether firms hired more or fewer paraprofessional staff in 2004 vs. 2003, the results approximate the findings for experienced professionals (shown above): 85% of firms hired about the same number in 2004 as in 2003.

TABLE 47 Paraprofessional Staff Hired in 2004 Relative to 2003 by CPA Firm Size

Number of AICPA	Percent Indicating	Percent of Firms Indicating That the Number of Paraprofessional Staff Hired in 2004			
Members Per CPA Firm	They Hire Paraprofessional Staff (%)	Higher (%)	elative to 2003 Wa Same (%)	Lower (%)	
More than 200 members	92	38	46	16	
50-200 members	81	27	68	5	
10-49 members	77	21	73	6	
Fewer than 10 members	59	10	86	4	
All CPA firms	60	11	85	4	

^{*}Paraprofessional staff are defined as nonprofessional staff employed to assist professional staff with clerical and other duties that would not be defined as traditional office duties.

APPENDIX A

Survey Methodology

Colleges and University Accounting Programs

For this survey the population of colleges and universities granting accounting degrees was defined as all schools with accreditation in accounting plus all schools accredited in business by the AACSB — International, or by the Association of Collegiate Business Schools and Programs, plus other accounting degree granting programs that appear in *Accounting Faculty Directory*— 2004-2005 (Hasselback, Prentice Hall).

In early 2005, 831 schools offering bachelor's, master's, and/or Ph.D. degrees in accounting were asked for data about the school, its graduates, and faculty. Information was gathered regarding the number of each type of degree awarded, and the gender, racial/ethnic, and employment placement of individuals receiving those degrees. A copy of the questionnaire can be seen in Appendix D.

To estimate the accounting graduates from nonresponding schools, regression equations were developed that related the number of graduates with bachelor's, master's, and/or Ph.D. degrees to the number of accounting faculty for the schools that responded to the survey. The number of accounting faculty in the schools surveyed was obtained from the Accounting Faculty Directory—2004-2005.

CPA Firms

In early 2005, the AICPA conducted a survey of about 5,800 CPA firms and sole practitioners affiliated with the Institute. Questionnaires were sent to all CPA firms affiliated with the AICPA that had more than 10 AICPA members and about 10% of the 42,092 CPA firms that have fewer than 10 AICPA members. Questionnaires asked firms to categorize newly hired recent college graduates by gender, ethnic/racial background, and area of assignment (i.e., accounting/auditing, taxation, management consulting services, and other specialty areas). The firms also were asked to identify themselves as majority-owned or minority-owned, and to give information on their recruiting efforts, professional and paraprofessional staff, and new hires that had experience. A total of 1,423 CPA firms responded for an overall response rate of 24%.

A weighted methodology was used to generate estimates for the firms that did not respond to the questionnaire. Regression analysis was used to estimate the demand by nonresponding firms for accounting graduates. For each of four firm-size categories (more than 200 AICPA members, 50–200 members, 10–49 members, and fewer than 10 members) regression equations were estimated that relate the number of new accounting bachelor's and master's graduates hired to the number of AICPA members for firms that responded to the survey.

Limitations of the Survey Results

A confidence interval or statement of accuracy of the results in the form of "plus or minus x percentage points" is not possible to compute. The methodology used for both surveys is not true statistical sampling because the populations surveyed are university accounting programs and CPA firms, not the individuals receiving the degrees or getting the new jobs and being characterized in the tables.

Survey Questionnaires

Academic and Career Development

December 2004

TO: ADMINISTRATORS OF ACCOUNTING PROGRAMS

The AICPA needs your assistance as we gather data for a survey of accounting programs. The information you supply will be used for the publication, *The Supply of Accounting Graduates and the Demand for Public Accounting Recruits—2005.* Your prompt response is essential for us to continue to provide current and relevant information about accounting education.

The questionnaire consists of two brief sections:

- School data information about your program is preprinted and simply needs to be updated.
- Student data number of accounting majors and degrees awarded during the 2003-2004 academic year with ethnic and gender breakdown. (Include graduate data where it is requested.)

Please return the questionnaire in the enclosed envelope by January 7, 2005. If it is necessary to distribute sections to staff members, please make sure that all of the sections are returned to the AICPA.

Also enclosed is a copy of the report on *The Supply of Accounting Graduates and the Demand for Public Accounting Recruits*—2004. This report is also available at the AICPA website at http://www.aicpa.org/members/div/career/edu/sagdpar.htm.

We appreciate the cooperation of those who participate in the survey. Please feel free to send us your comments on the information presented.

If you have any questions, please contact Leticia Romeo at (212) 596-6221.

Sincerely,

Beatrice Sanders

Academic and Career Development

December 2004

Dear Managing Partner or Human Resources Partner:

The AICPA is conducting its study of accounting program administrators and CPA firms to gauge the supply of accounting graduates and the demand for public accounting recruits. The information gathered with these surveys is very useful to the AICPA in planning for the profession's needs and useful to the practicing profession as a source of information for human resources planning and employment trends. The data gathered will be reported in the publication *The Supply of Accounting Graduates and the Demand for Public Accounting Recruits*—2005.

We will greatly appreciate your participation in the study by answering the questionnaire as accurately and completely as possible and returning it to us in the enclosed postage-paid envelope by January 7, 2005. The reliability and usefulness of the results depend heavily upon broad-based participation.

If it is necessary to forward this questionnaire to the appropriate party or office, please do so. As in the past, the data gathered are entirely confidential and will be used only in summary form. To ensure anonymity, we are not asking you to sign your name or your firm's name.

A copy of the report on *The Supply of Accounting Graduates and the Demand for Public Accounting Recruits—2004 is* available at the AICPA_ website at http://www.aicpa.org/members/div/career/edu/sagdpar.htm

We appreciate the cooperation of those who participate in the survey. Please feel free to send us your comments on the information presented.

If you have any questions, please contact Leticia Romeo at (212) 596-6221.

Sincerely,

Beatrice Sanders

Bea Landers

Director

American Institute of Certified Public Accountants

AICPA SURVEY ON THE EMPLOYMENT OF NEW GRADUATES AND OTHER PERSONNEL WITHIN PUBLIC ACCOUNTING

IMPORTANT

Please answer the following questions by circling the numbers corresponding to your responses or by writing in your responses. Your responses should cover your entire firm — all offices or locations.

I. Employment of New Graduates

1. We would like to determine the number of new accounting and nonaccounting graduates who began employment at your firm during 2004. New graduates are defined as those who began employment at entry-level positions with no or only nominal previous experience with a CPA firm.

If your firm did not hire new graduates who began employment at entry-level positions in 2004, please skip to Section II (Other Personnel Information) on page 4.

Please indicate below the number of **new graduates** with the following degrees who began employment at your firm on a full-time basis during **2004**. (**Note**: If, for a particular degree, there were **no** graduates who began employment, enter **0**; if the information is **not available**, enter **NA**.) **Do not include** those graduates who were recruited in 2004 to begin employment in 2005.

Note: If a newly employed graduate has more than one degree, the individual should be counted only once and placed according to the highest degree.

Acc	counting Degree	Number of new graduates who began employment on a full-time basis during 2004:

		1.	Higher				
		2.	The Same				
		3.	Lower				

III. Your Demand Forecast

The AICPA has committed significant resources to a five-year direct marketing campaign to attract students to become CPAs. The following questions will help us estimate the practicing profession's need for future CPAs, key baseline measures for the campaign. We realize that projecting future needs is difficult given the fast-changing business environment; however, we ask that you do your best to provide us with estimates.

18.	Comparing 2005 to 2004,
